TITLE : DUBBING SYSTEM, DUBBING METHOD

**ABSTRACT :** PROBLEM TO BE SOLVED: To enable to cope with even unregistered CD(compact disk) or the like at an information center side performing processings for protections of copy rights and chargings as to dubbing operations at terminal device sides.

**SOLUTION:** At the time of performing a dubbing from a certain media at a terminal device side, the side demands the permission of the dubbing to an information center 1 and also transmits identification information of the CD as the object of a dubbing operation or the like. Then, the information center 1 sets a permission and a non-permission with the authentication processing of a user and a processing in accordance with identification information or the like to transmit them to the terminal device side. Moreover, the information center 1 judges whether the CD as the object of the dubbing operation or the like are a registered CD or not by retrieving a registered database based on the identification information of the object of the dubbing operation transmitted from the terminal device. When the CD is a CD which is not yet registered, the center demands information concerning the object of the dubbing operation of the unregistered CD to the terminal device and when information concerning the object of the dubbing operation is transmitted from the terminal device, the center stores the information in an unregistered database means to make them data for a later charging or the like.
